

# Oklahoma's Ice Storm 2007

InFIRE

May 2008

Detroit, Michigan

From HS Today,  
March 2008  
issue

Taken in Enid, Oklahoma

# POSSIBLE WINTER STORM? SUNDAY - MONDAY

**Shallow cold air** will move south into OK/TX over the weekend. **Warm, moist air** will move north and will be lifted above the cold surface air. If the low levels remain cold enough, parts of OK could get an ice storm.

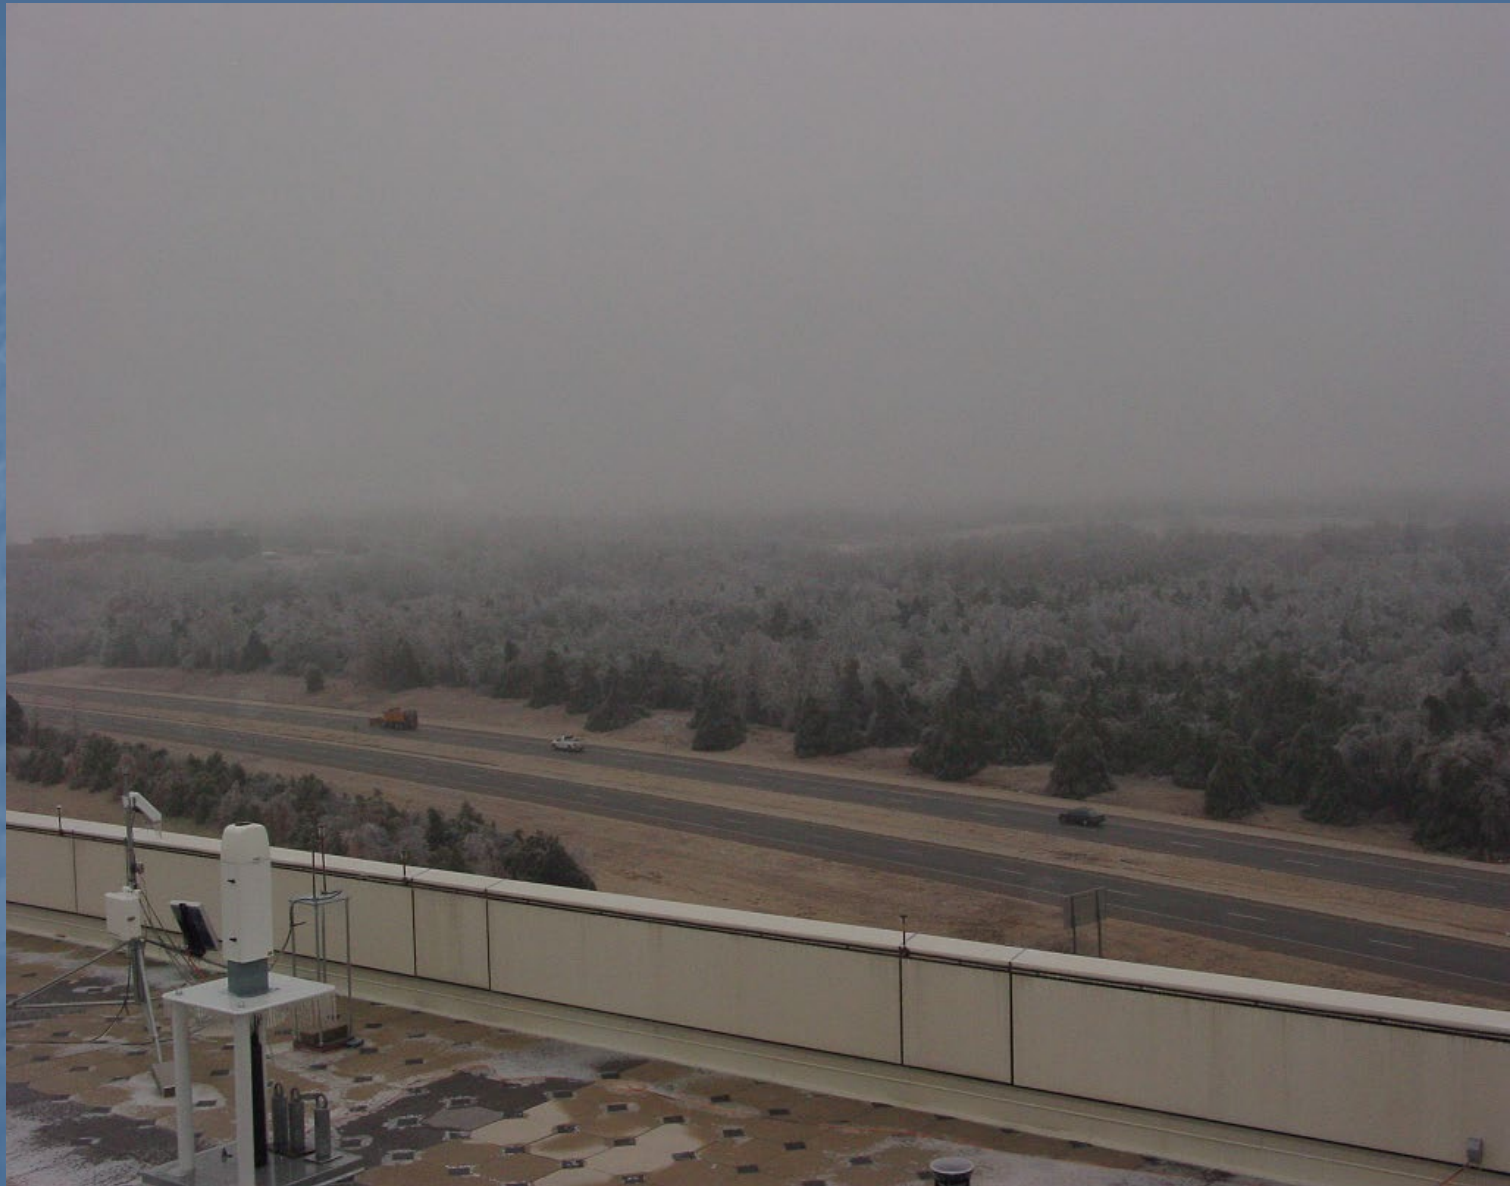

MOST LIKELY  
TO BE SNOW

MOST LIKELY  
TO BE ICE  
(FREEZING  
RAIN)

Graphiccast Tue Dec 4 2:54PM CST  
Norman Forecast Office

Older, more mature trees suffered the most destruction

Younger trees just bent over from the weight

Through the fence

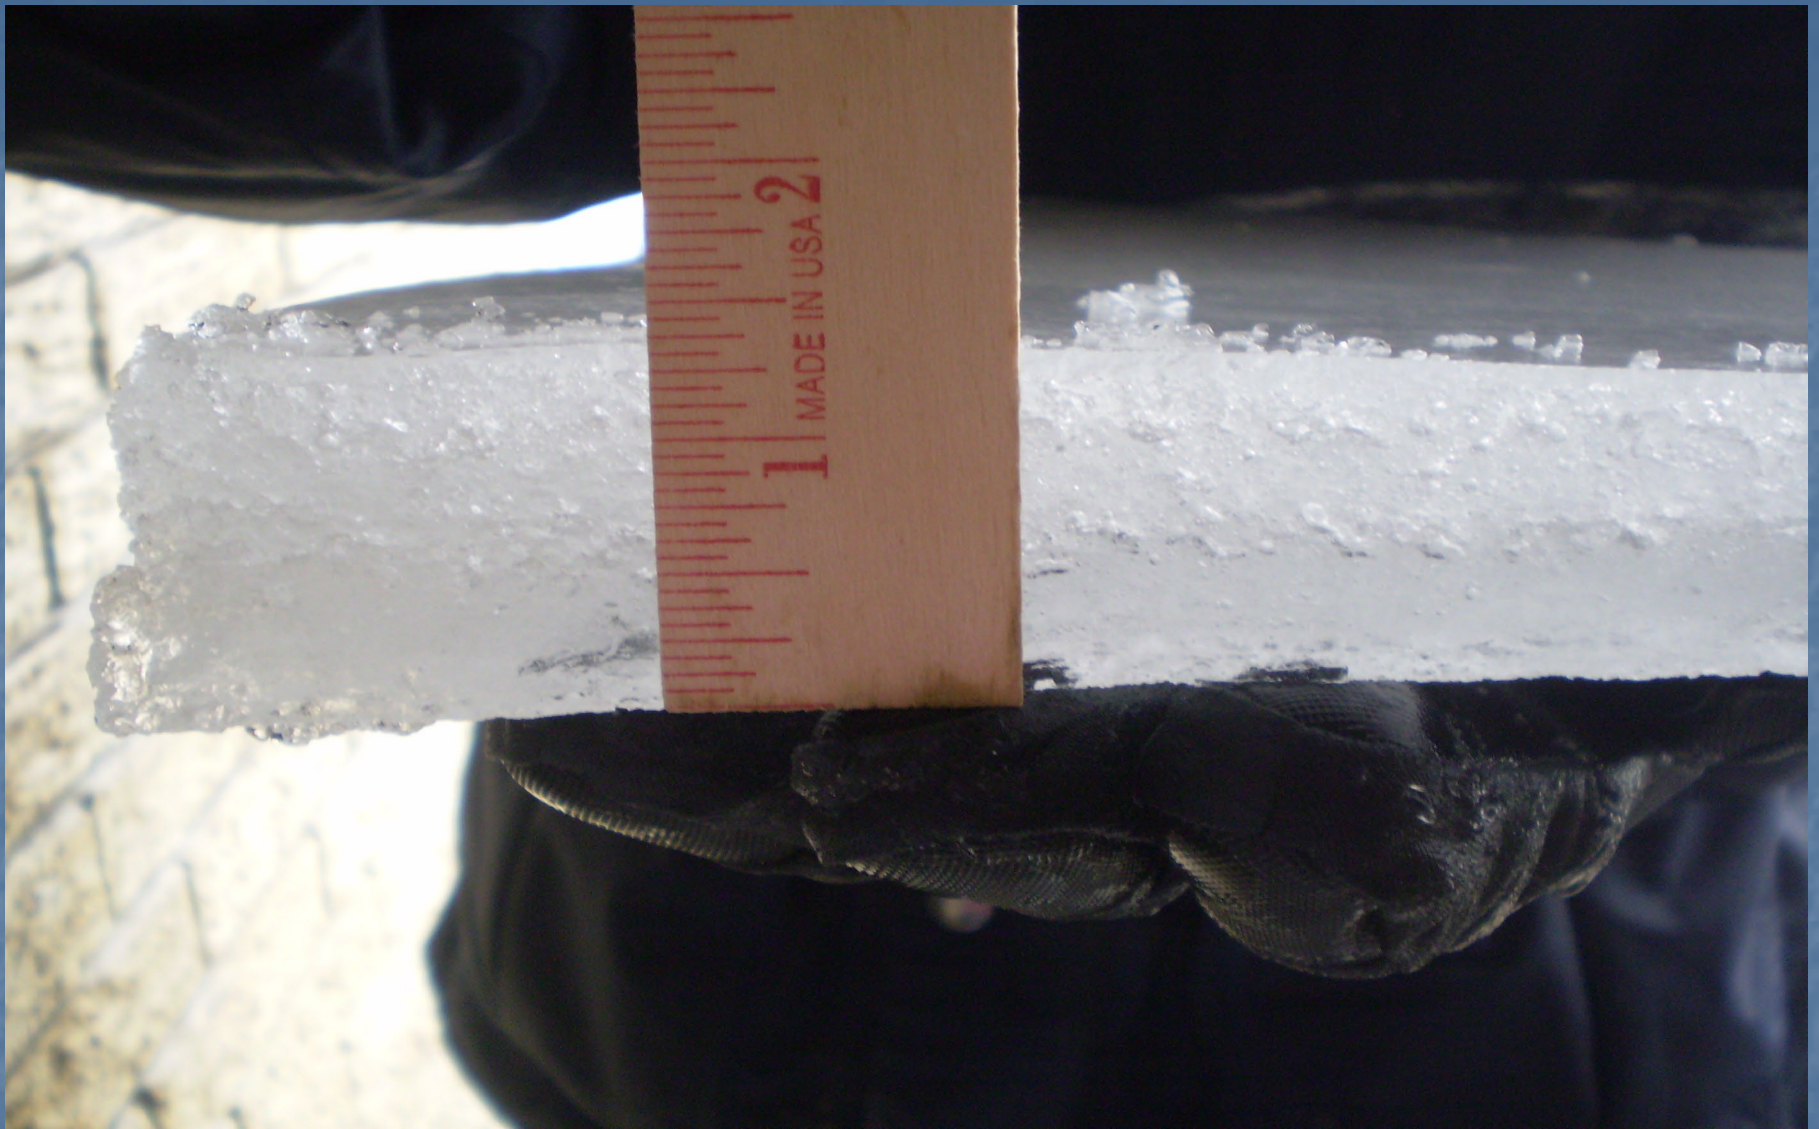

The fence is completely destroyed

## Covering the windshield wipers

The ice, in certain places around the state, was 1.5 inches thick.
